## HVAC&R Industry meets in İzmir at the 14th National Installation Engineering Congress and the 7th Teskon+Sodex İzmir Exhibition in April 2019!

*With Teskon+Sodex 2019, the meeting place of the air-conditioning industry will be held in İzmir between 17-20 April in 2019! While the exhibition brings the industry leaders together, the Teskon congress will direct the present and future of air-conditioning and installation engineering in line with the latest technologies through the academic and scientific studies that will be presented at the TESKON Congress. One of the most important industry meetings in its own field, Teskon+Sodex 2019, while being the industry's locomotive, also aims at creating awareness on air-conditioning, energy and installation, which are among the most important topics of our age, through the subjects it plans to dwell upon within the scope of the congress.*

Offering his opinions on the Exhibition, which will be held between **17-20 April 2019** in İzmir, Hannover Messe Sodeks Fuarçılık General Manager Alexander Kühnel said, "the Teskon+Sodex Exhibition and the TESKON Congress, which are very important for the air-conditioning sector, also play an important part with respect to the region's potential."

**10 September 2018, Istanbul** - The Teskon+Sodex Exhibition and TESKON Congress will take place on **17-20 April 2019** at the İzmir Tepekule Congress and Exhibition Center under the cooperation of the foremost corporations and institutions of the industry. The exhibition organised by **Hannover Messe Sodeks Fuarçılık** will also host the **14th National Installation Engineering Congress- TESKON**, which will be organised under the guidance of the İzmir branch on behalf of the TMMOB Chamber of Mechanical Engineers.

Pointing out that the Aegean Region is one of the important production areas of the Turkish air-conditioning sector, **Hannover Messe Sodeks Fuarçılık General Manager Alexander Kühnel** said:

"The Aegean Region is a very important region for the air-conditioning industry, which is among the fastest-growing industries of the Turkish economy. This is why it is very important that the region displays its potential at high quality exhibitions. In this sense, the Teskon+Sodex Exhibition assumes a very important task. This year, the exhibition will take place on an area of 1800 m<sup>2</sup>, with the participation of over 100 companies. The companies will find the opportunity to exhibit the heating, refrigeration, ventilation, insulation, pump and valve industries' products under various groups. In addition to bringing together manufacturers under a single roof, the exhibition shall also

Deutsche Messe

allow the visitors to discover the innovations in the industry. I am of the opinion that we will bring to life an event that suits İzmir, the heart of the heating, refrigeration and ventilation industries in the region in terms of production and usage"

### The Exhibition and the Congress Together!

The Teskon+Sodex Exhibition, which will be held at the İzmir Tepekule Congress and Exhibition Center will also host the **14th National Installation Engineering Congress**, which will be organised under the guidance of the İzmir branch on behalf of the TMMOB Chamber of Mechanical Engineers. While the congress to be held within the scope of TESKON, which will be organised in 2019 under the main theme "**Facts of Mechanical Installation and the Future**", aims at creating added value from the present to the future on the subject of the industry's future through seminars, courses, panels, symposiums, special sessions and social events, with the help of experts, the proceedings that will be published following the congress will continue to serve as a guide for the industry.

Emphasising that the exhibition offers various opportunities in this respect too, **Alexander Kühnel said, "Teskon+Sodex is a platform on which we offer participants and visitors unique opportunities with the supportive programmes organised concurrently with the exhibition. Organised concurrently with the Sodex Exhibition for over 12 years, TESKON brings many eminent academicians, architects, engineers, officials of project companies, and sector professionals together under the Teskon+Sodex roof. This way, while bringing participating companies together with their potential customers for new cases of commercial cooperation, we also offer new opportunities for the sharing of knowledge and experiences through the '14th National Installation Engineering Congress'.**

Since 1993, the TESKON Congress has been organised biennially under the guidance of the İzmir Branch on behalf of the TMMOB Chamber of Mechanical Engineers. Focusing on theoretical and applied scientific and technological developments both in the field of installation engineering and in other disciplines, the congress aims at bringing Turkey's prominent professionals and academicians together under the roof of **Teskon+Sodex** in order to enable information-sharing.
