teskon+SODEX 2017 "The Most Important HVAC&R Meeting of The Region"

Key Figures

Hosting one of the most important meetings of the HVAC-R industry, teskon +SODEX brought together the industry in April 19th - 22nd, 2017 – MMO Tepekule Congress and Exhibition Center. Organized by Hannover Messe Sodeks Fuarcilik, the event showcased various product groups such as Heating, Refrigeration, Air-Conditioning, Pump, Valve, Water Treatment, Geothermal and Solar Power Systems under a single roof and allowed its visitors to discover the innovations in the industry. teskon+SODEX where 96 companies exhibited their products and services in 1761 m² net area, provided an attractive trade platform during 4 days concurrently with 13th National Installation Engineering Congress.

FAIR LAYOUT & DISTRIBUTION OF EXHIBITORS

A Katı / Floor A

İsmet Gencer / Alarko, Senior Vice President

"We have been participating at all SODEX fairs, both in İzmir and in İstanbul; therefore we can say that we will be happy to exhibit in the following years again and we believe that we will continue to participate in the fairs. We have been participating at the SODEX fairs both in İzmir and in İstanbul, since the years that they have been organizing."

Serhat Yıldızman / KLS, Production Planning and OEM Technical Support

"We have been participating at teskon+SODEX since 2010. We are happy about participating at teskon+SODEX because this fair is important for us. This is not only a fair but also like a congress, a symposium, a seminar which forms the sector so it is very beneficial. As long as this sector and we, our competitors, our customers, our partners and friends become more conscious, we can bring this sector to a better place, we can manufacture better, more efficient devices and this is important for us."

Manuel Togaç / Karyer, Marketing Division Manager

"teskon+SODEX has been an important fair for us for many years now. İzmir exhibition was very important for us this year because we have just made a new plant investment in Akhisar and we wanted to discuss this with the companies. We also participate at ISK-SODEX Istanbul 2018. In this regard it is also an important opportunity for us to meet our customers in Izmir and the local participants."

Murat Sözübir / Viessmann, Sales Manager

"teskon+SODEX Fair is very beneficial for us. This is a very important fair for us because it is regionally held every two years. It is an opportunity for the sector shareholders, mechanics, engineers to come together and exchange ideas, see the innovations in their field of expertise and come together with us.

In addition, ISK-SODEX Istanbul is of course a bigger exhibition than İzmir. The investors and the sector shareholders are trying to participate in these fairs. As Viessmann we are celebrating our 100th anniversary this year all around the world and meeting the sector shareholders in such events and exchanging information with them. Therefore I can say that teskon+SODEX Fair in İzmir is very good and very effective for us."

Nadir Sarkuş / liNear, Business Development

"Linear is a German software company and our target group is planners and project developers. In Turkey we are participating in all Sodex Fairs in Istanbul and Ankara for 5 years, we are participating in the İzmir fair for the first time. In this fair we met a visitor group that we had not met in previous fairs. Visitors were closely interested in the subject. The reason is probably that the fair is held concurrently with teskon and conferences. This normally results in participating of colleagues who are involved. Our observations in the first two days are really great, we are happy about the fair. We have discussed it within the company and we are planning to participate again in the next İzmir fair."

Kerim Gümrükçüler / İmbat, Chairman of the Board

"We support teskon since the very beginning and we are always standing behind it and will continue to do the same. All project developers in Turkey are here. Sodex is a very important brand in our sector. We have been participating for long years. We also would like to thank for another thing, the Sodex Fair in Istanbul is now known everywhere, people are asking about it when we go to Europe.

We have always participated in the SODEX Fairs in Istanbul and in İzmir until now and we will continue to participate."

Rebii M. Dağoğlu / Aldağ, Member of Board

"Merging of teskon and Sodex organizations in İzmir has given acceleration to this fair and created a serious recognition. Thus it turned into a serious platform where companies with engineering knowledge which have R&D culture and have innovative production mechanisms would like to show themselves.

I believe that fair organizations also incorporating seminars, panel discussions on R&D, innovations and sector developments will be one step ahead compared to their counterparts. I think this is what makes teskon important.

We have been participating in this fair for long years. This environment created thanks to teskon+SODEX, which is open for developments, is turning into a structure where everyone can contribute. I believe this should be the main idea in these types of organizations and we are on the right track. Therefore we will again be participating in Sodex Fair in Istanbul which we took a break for a few years and we will be booking our space."

Seçkin Tuncer Erdoğmuş / Doğu İklimlendirme, General Manager

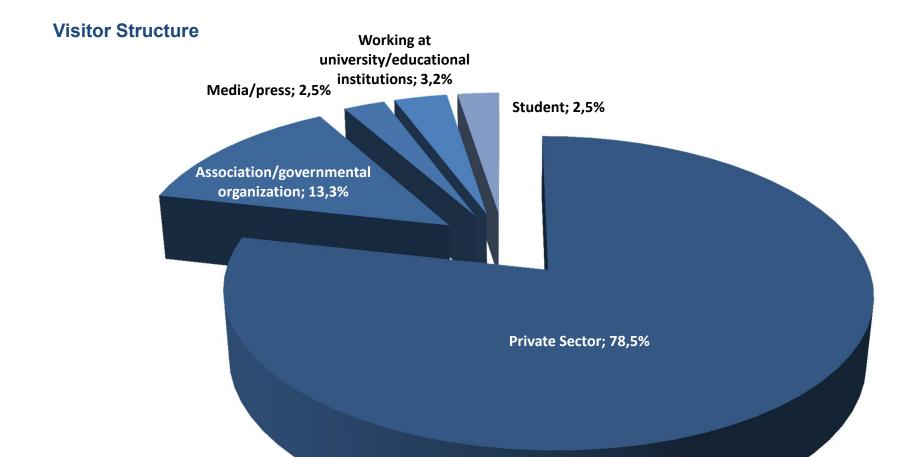

"teskon and Sodex are both very strong brands separately. This is the 13th teskon congress and we have been participating in these events for long years. This is in fact our contribution to our sector because this congress is serving the sector with reports, seminars and courses. We are happy to be part of this congress because we are part of this sector. This congress has become much stronger with the contributions of Sodex and the number of participating companies is increasing every day. The quality is also increasing and this has become a significant power all together. We believe that we can reach out to our target group in these fairs.

In addition, ISK-SODEX Istanbul is now a world brand. When we look at the profiles of the participants and the visitors it is a platform where international companies exhibit their products and also a platform where international visitors increasingly come. We are not participating in this fair for the Turkish market; this has become a platform where we meet almost all our customers from Europe, and our customers in the Middle East and the Turkic Republics. This is very important for us. As I told it has become a brand. Sodex is now seen as one of the largest three fairs in Europe, this is very important for us. Next year again in February 2018 we will be exhibiting our products in a larger booth and meeting with our customers.

CONFERENCES

Organized by UCTEA Izmir Branch on behalf of TMMOB Machinery Engineers, 13th National Installation Engineering Congress, was named under the main theme of "Integrated Performance" between the dates of April 19-22, 2017 at MMO Tepekule Congress and Exhibition Center concurrently with teskon+SODEX Exhibition, organized by Hannover Messe Sodeks Fuarcilik A.Ş. Congress and the exhibition was held at 10 seminar halls and the exhibition area. Teskon Congress has been organizing since 1993 with 24 years of knowledge. Teskon Congress is supported by 24 institutions as well as universities. 167 notices are presented in total of 55 sessions. During Teskon Congress 7 symposiums, 4 seminars, 15 courses, 2 panels, 3 special sessions and 3 morning meetings were held.

SOCIAL RESPONSIBILITY PROJECT

Every exhibitor of teskon+SODEX as well as the speakers of the opening ceremony and national and international partners received a certificate from KACUV— an organization which supports the children's health who are suffering from cancer.

PROMOTION CAMPAIGNS

Advertisements and/or banners in 10 national and 13 international sector magazines/portals

Cooperations with 12 international HVAC&R Exhibitions from all around the world in terms of banner and catalogue advertisement exchange

Poster and invitation distribution activities in international exhibitions like as AHR, ISH

Special signage placement in important Industrial development zones and important routes like: Manisa Ind. Dev. Zone, Torbalı Ind. Dev. Zone, Kemalpasa Ind. Dev. Zone, Around MMO Tepekule Congress and Exhibition Center, Yesildere (Airport route), Cigli Ind. Dev. Zone and Manavkuyu route

Invitation and posters distribution in Industrial Development Zones like: İzmir Atatürk Ind. Dev. Zone, İzmir Kemalpasa Ind. Dev. Zone, Aliağa, Torbalı Ind. Dev. Zone, Manisa Ind. Dev. Zone and Yenisehir and Universities like: Dokuz Eylul University and Izmir Yuksek Teknoloji Enstitüsü
